KELSEY'S

Hardy American Plants, Rhododendrons, Azaleas, and Specimen Evergreens

I. Catalog of BOXFORD NURSERY

Boxford, Massachusetts

II. Catalog of HIGHLANDS NURSERY

3800 FEET ELEVATION

Pineola, North Carolina

At Boxford Nursery (East Boxford P. O.), on the Georgetown branch of the B. & M. R. R., may be seen growing the choicest collection of specimen nursery stock, selected for the most discriminating buyers. Special attention is given to hardy native plants, which must always be the basis of successful permanent plantings.

SPECIMEN STOCK. There is a growing demand for fine specimen stock in Conifers, Rhododendrons, Kalmias, Andromedas and other evergreens, and Boxford Nursery is established to supply this need.

Landscape architects, park and cemetery superintendents, and the owners of large estates will find it of great advantage to visit Boxford Nursery and personally select material in the nursery row.

PRICES are made to fit the quality of stock sent out. Few realize that the real value of nursery stock is largely underground. Frequent transplanting, and handling specimens with adequate, burlaped balls, means success and quick results. It costs more, but it is the fixed policy of the Boxford Nursery; and "cheap" stock will not be handled or sent out. **The best is always the cheapest.**

HIGHLANDS NURSERY SHIPMENTS are made from Pineola, N. C., freight station, and prices in this list are made on this basis. Freight and express rates gladly quoted. Via Norfolk steamship lines, deliveries to northern and eastern points are quick and rates are low.

SHIPMENTS OF "COLLECTED" RHODODENDRON MAXIMUM and KALMIAS are from my special fields in Pennsylvania and the South, depending on destination and quality of stock desired. The best clumps come from the South, from high altitudes. "COLLECTED" RHODODENDRON CATAWBIENSE comes only from the South.

MY NURSERIES ARE UNIQUE, being the first to grow Native American Ornamentals, and having the only large and complete stock of Hardy American Plants in existence.

To Landscape Architects, Parks Cemeteries, Botanical Gardens, and other Public Institutions a special discount of **10%** *will be allowed on prices in this catalogue.*

DESCRIPTIVE CATALOGS, illustrated, are mailed on request, and advice on the right way to grow Rhododendrons, Azaleas and other native plants is gladly given. Send for "How to Grow Rhododendrons Successfully."

VISITORS ARE ALWAYS WELCOME. Boxford Nursery is easily reached by train or automobile, and Mr. Kelsey will be glad to meet prospective customers at the nursery by appointment.

A visit to Boxford Nursery during the blooming season of Rhododendrons and Azaleas is especially worth while.

SALEM, MASS.

PART I.

CATALOG OF BOXFORD NURSERY

Note: All plants are transplanted and nursery-grown unless plainly marked otherwise.

The larger sizes are always shipped with balls and are burlaped, which means they will grow. Prices include all charges, paeked free on board cars, Boxford, Mass., freight station.

Evergreen Trees and Shrubs

	Each	10	100	1,000
Abies arizonica. 4 ft.	$4 00			
brachyphylla. 4 ft.	3 50			
concolor. White Fir.				
1 to 1½ ft.	1 00	8 00		
2 to 3 ft.	1 75	15 00		
3 to 4 ft.	3 00	25 00		
5 to 6 ft.	7 00			
6 to 8 ft.	9 00	80 00		
8 to 10 ft.	15 00	135 00		
10 to 12 ft.	25 00			
12 to 14 ft.	35 00			
14 to 16 ft.	45 00			

Abies fraseri. Fraser's Fir. The northern species, Abies balsamea, is almost worthless in any but the latitude of middle and northern Maine, as it becomes "leggy," thin, and is short-lived. Fraser's Fir, however, a distinet species from the highest peaks of the Carolina mountains, makes a perfeet speeimen lawn and screen tree, with dark green, thiek-set foliage (blue underneath) and eompact, pyramidal habit. It is one of the choicest of all American conifers of the Fir section.

Abies fraseri is destined to become one of the most popular and widely planted of Firs, and to meet this demand, we have them by thousands in all sizes.

6 to 8 ft.	12 00			

Andromeda (Pieris) floribunda. 2 to 4 feet. One of the finest of all broad-leaved Ameriean shrubs. Compact growth, with shining evergreen leaves and abundant raeemes of showy white flowers in May. The next season's buds appear after the flowering season and give the plant the appearanee of being in bloom the year round. My stoek is all strictly Ameriean-grown and of finest quality. The imported Andromeda is very often difficult to establish. All plants are heavily budded.

	Each	10	100	1,000
6 to 9 in.	80	7 00	60 00	
9 to 12 in.	1 00	8 00	70 00	
1 to 1½ ft.	1 50	12 50	100 00	
1½ to 2 ft.	2 50	22 50		

Japonica. Japanese Fetter Bush. This fine species is of more upright growth than floribunda, the young foliage presenting striking shades of reddish pink early in the season. The flowers are in terminal racemes, and very showy.

1 to 1½ ft.	$1 50	$10 00

chinensis pfitzeriana. 2 ft.	1 50	12 50		
chinensis procumbens 1½ to 2 ft.	1 00	9 00		
communis aurea. Golden Common Juniper. 1 to 2 ft.	1 00	8 50		
2 to 3 ft.	1 50	12 50		

Juniperus communis depressa.

	Each	10	100	1,000
Prostrate Juniper. 6 to 12 in diameter	50	4 00	30 00	
1 to 1½ ft. diameter	75	6 00	50 00	
1½ to 2 ft. diameter	1 25	10 00	90 00	
2 to 3 ft. diameter	1 75	15 00	130 00	
3 to 4 ft. diameter	2 50	20 00	180 00	
Larger specimens, up to	15 00			

Without doubt this is the best prostrate form of Juniper for ground-over. It is at home on sandy or gravelly hillsides, fully exposed to the sun, where single plants often reach a diameter of 15 feet or more.

In shade it does well where other shrubs or grass will not thrive, forming a looser covering, however, than in the open. It varies in form from the completely prostrate type to the ascending type. 2 to 4 feet high.

We have several thousand transplanted specimens to select from, up to 8 feet in diameter.

	Each	10	100	1,000
communis prostrata. 2 to 3 ft.	75	6 00		
japonica aurea. Golden Japanese Juniper. 3 to 4 ft.	3 00	25 00

10 to 12 ft.	12 00	110 00		
12 to 14 ft.	15 00	140 00		

These prices are for transplanted specimens of good grade. Larger sizes or special selection at special prices.

BOXFORD NURSERY makes a specialty of the Red Cedar. It is, we believe, the finest of all evergreens for formal

EVERGREEN TREES AND SHRUBS (continued)

plantings for New England conditions, giving an effect somewhat like the Italian cypress.

As a background for rhododendrons, shrubbery and flowers, it is unequalled, except perhaps by the Carolina hemlock. It does not take the place of other evergreens, but holds a unique place for certain effects, and no other evergreen can take its place. Individuals vary in color from light and dark green to steel-blue.

We offer hundreds of transplanted specimens up to 20 feet in height. We also collect specimens with large balls in car-lots or less at prices according to selection, ordinarily 75 cents a foot in height.

	Each	10	100	1,000
Juniperus virginiana elegantissima.				
3 to 4 ft.	2 00			
virginiana glauca. Blue Virginia Cedar.

1½ to 2 ft.	2 00			
virginiana schotti. 1 to 1½ ft.	1 25			
2 to 3 ft.	2 00	18 00		
Kalmia angustifolia. Narrow-leaved Laurel.				
6 to 12 in.	35	3 00	20 00	

Kalmia latifolia. The Mountain Laurel. One of the grandest of our native broad-leaved evergreen shrubs, attaining tree-like proportions in our southern mountains. In cultivation it is a broad, thick shrub, and, when in full bloom, of surpassing beauty. The wheel-shaped flowers in close terminal corymbs, pure white to pink, appear in May or June in such profusion as almost to smother the foliage. Its thick, shining leaves, conspicuous the year round, make it a shrub of greatest value for massing. The hardiness of Kalmia latifolia is beyond doubt, it being found sparingly in Nova Scotia and increasingly in abundance through New England and the middle Atlantic states (particularly in the higher altitudes), till the crest of the southern Alleghanies is reached.

This is another of my specialties and my stock is unequalled elsewhere.

	Each	10	100	1,000
1 to 1½ ft.	60	5 00	40 00	
1½ to 2 ft.	80	7 00	60 00

1½ to 2 ft. clumps	2 00	17 50	150 00	
2 to 3 ft. clumps	3 50	32 50	300 00	
3 to 4 ft. clumps	4 50	40 00	375 00	

Leucothoe catesbaei. Grows 3 to 8 feet. Few shrub-evergreens of the broad-leaved sort have the grace of this one. The thick, shining green leaves are evenly disposed on long, recurved branches, with dense racemes of beautiful, white, bell-shaped flowers. As an under-shrub or for banks and the borders of rhododendron masses or along streams it is without a rival. The sprays make beautiful winter decorations indoors, turning a rich bronze in the fall where exposed to the sun.

	Each	10	100	1,000
6 to 12 in.	$0 50	$4 00	$30 00	
1 to 1½ ft.	75	6 50	60 00	
1½ to 2 ft.	1 50	12 50	110 00	

The larger sizes of Leucothoe are heavy clumps for immediate effect.

RHODODENDRON CAROLINIANUM

A New American Species

Clear Pink. Absolutely Hardy.

The smallest Alleghanian speeies; though wiid, it attains a height of 15 feet and is wide-spreading. Leaves dark green, usually biunt and narrow, eovered with rusty dots beiow, much smaller than either maximum or catawbiense. Flowerciustors appear in greatest profusion in June, eovering the plant with a rose-eolored mantle. Fine for rocky siopes or hiii-sides, standing exposure unusually weii, and invaiuable as a singio specimen or for massing with the other species.

RHODODENDRON CATAWBIENSE

Of the Carolina Mountains

The Hardiest of all Rhododendrons

It was this magnificent Rhododendron that over a hundred years ago was introduced into Europe, supplying, together with Rhododendron maximum and R. punctatum, color and hardy blood to the cultivated "hybrids", but with a conse-

"And to paint these home pictures we need chiefly American material. We must face this deadly parallel:

"What We Really Plant. 70% European trees and shrubs and horticultural varieties. 20% Chinese and Japanese. 10% American.

"What We Ought To Plant. 70% American trees and shrubs, i. e., native to America. 20% Chinese and Japanese. 10% European and horticultural."

Wilhelm Miller, in "What England Can Teach Us About Gardening."

quent loss of hardiness; and so today, for American gardens, where ironclad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the southern Alleghanies, where it attains a height of 20 to 30 feet.

Considering the extreme hardiness, color of flower, compact growth and remarkable texture of foliage, which is a deep, shining green, and far superior to the better-known Rhododendron maximum, we can recommend the true native catawbiense as the finest for general use, withstanding exposure and extremes of temperature where other Rhododendrons fail.

Do not confuse this true species, which is absolutely hardy, with the common so-called catawbiense hybrid seedling so freely imported from Europe, which is at best half-hardy, and even when branched above is a single stem, showing bareness underneath for years.

Unlike Rhododendron maximum, it is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy, half-breed, imported variety noted above), and as sent out by Highlands Nursery is always on its own roots.

For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the northern United States and Canada, where strictly hardy plants must be employed. As a rich, finished border to plantations of the commoner Rhododendron maximum, the value of Rhododendron catawbiense cannot be overestimated.

Do not compare our many-stemmed clumps with the single-stemmed, "bushy", half-hardy Rhododendrons offered by importers. There is no comparison.

Catawbiense hybrids. Hardiest varieties, including the following:

Album elegans, Anna Parsons, caractacus, catawbiense alba, everestianum, General Grant, Mrs. Milner, President Lincoln, Parsons' Gloriosa, purpureum elegans, roseum elegans and others, according to size and selection, $1 to $4 each.

RHODODENDRON MAXIMUM

The Great American Rosebay

Perfectly Hardy in the Latitude of Quebec

Rhododendron maximum is, without doubt, the noblest of American broad-leaved shrubs. It is found growing sparingly in New England and New York, more abundantly in the Pennsylvania mountains, but reaching perfection only in the southern Alleghany Mountains, where it grows in such luxuriance as to form a striking feature in the mountain landscape. Its large, waxy white or delicately pink flowers appear in large trusses in July, the latest of all the Rhododendrons, greatly enhancing its ornamental value as a broad-leaved evergreen for finished landscape effect.

Not even in Asia do Rhododendrons grow more luxuriantly than in our southern Alleghany Mountains, where they attain a height of 30 feet or more. They must be seen in their native lavishness of growth and bloom, on the mountainsides or hanging over the dashing, ice-cold streams and waterfalls, to be properly appreciated, and a trip to the high Carolina mountains in spring and early summer is a never-to-be-forgotten series of joys to the lover of nature.

HARDY AZALEAS

The finest Azaleas in the world for permanent planting under American conditions are native species, including A. arborescens, A. vaseyi, A. lutea (calendulacea), the great flame-colored Azalea, and A. nudiflora, A. viscosa and A. canescens.

I have a stock of thousands of the finest plants in all sizes that will give immediate effect, and prices will be sent on request. It should be remembered that Azaleas play a very important part in the making of a permanent Rhododendron-bed, but care must be used to avoid clashing of colors. I shall be glad to make up proper combinations for my customers.

Azalea arborescens. Fragrant White Azalea.

LILACS ON THEIR OWN ROOTS

Fine collection of some of the best and newest hybrids in specimen stock. It is only recently that Lilacs on their own Roots were obtainable.

Ordinary stock is grafted on Privet, which "suckers" badly, often crowding out and killing the grafted top and leaving a Privet instead of a Lilac. The Lilac is the queen of spring-flowering shrubs, and the new hybrids mark an epoch in horticulture. For a tall hedge or screen there is nothing better than the Lilac, and for this purpose the old-fashioned white and purple sorts make a charming combination.

D—double varieties; S—single varieties.

Dodecatheon. Shooting Star; American Cowslip. Among the most charming early wild flowers. The species offered are easily grown in borders where they are subject to drought after blooming.

	10	100
clevelandi. Tall-growing form, with pure white or delicate pink flowers	$1 00	$4 00
hendersoni. Another of the best species with red flowers	1 00	4 00
patulum. White, pale cream-color or rarely pinkish	1 00	4 00
radicatum. Flowers deep rose color	1 50	8 00
Drosera rotundifolia.	1 00	8 00

Erythronium (Dog's Tooth Violet). These small, bulbous plants are extremely handsome in foliage and flowers, but to get best results should be massed in cool, moist woodlands or borders or along streams. Among the earliest spring flowers and, with their mottled leaves, make a fine, early ground-cover in shady locations.

virginica. Virginia Chain Fern. 24 to 64 in.		1 00	8 00	

CATALOG OF HIGHLANDS NURSERY

PART II

At my Highlands Nursery, Pineola, North Carolina, 3,800 ft. elevation, on the crest of the Alleghany Mountains, one may see Rhododendrons, Azaleas, Leucothoes, Kalmias and Andromedas growing in all sizes by tens of thousands in single species, and nowhere else can be found such a collection of rare American plants of unquestionable hardiness—the best for American gardens.

The Carolina Mountains is the native home of the most beautiful Broad-leaved Evergreens and Ericaceous Shrubs. Highlands Nursery not only ships direct to customers, but is a great propagating plant, supplying material for my Boxford Nursery.

DECIDUOUS AND EVERGREEN

Trees, Shrubs, and Woody Vines

NOTE.—All plants are transplanted and nursery-grown, unless plainly marked otherwise.

This is a catalog of nursery-grown plants growing at my Highlands Nursery, Pineola, North Carolina.

RHODODENDRONS and MOUNTAIN LAUREL

"COLLECTED" CLUMPS BY THE CARLOAD

Delivered at your station. To be shipped from point determined by me.

For the area covered and effect produced, a carload of Rhododendrons or Kalmias, offered below, is the cheapest landscape proposition offered. I ship an unusual grade of splendid clumps, each plant a specimen and burlaped separately. Don't accept cheap stock, thrown into cars without burlaping, and with the fine, hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end. While fine results may be had from "collected" Rhododendrons, particularly if purchased from a reliable source, where greatest care is used in digging and handling, results are never so sure as when nursery-grown stock is used.

Rhododendron catawbiense "Collected" Clumps

Each plant collected from the open. Prices, delivered f. o. b. your station, if east of the Mississippi river.

Car containing 200 clumps, 1 to 3½ ft., for $280 00
Car containing 300 clumps, 1 to 3½ ft., for 380 00
Car containing 400 clumps, 1 to 3½ ft., for..... 480 00
Car containing 600 clumps, 1 to 3½ ft., for..... 600 00

Other combinations and sizes quoted on request.

Rhododendron maximum "Collected" Clumps

Prices in carload lots, delivered f. o. b. your station, if east of the Mississippi River, collected from open ground.

Car containing 300 clumps, 1½ to 4 ft., for.....$300 00
Car containing 400 clumps, 1½ to 4 ft., for..... 375 00
Car containing 600 clumps, 1½ to 4 ft., for..... 500 00

Other sizes or combinations will be made up to suit customers. It is far cheaper to buy my kind at slightly increased price, and have plants that will grow.

Rhododendron maximum and R. catawbiense

"Collected" Clumps by the Carload

Mixed cars, delivered free at any station east of the Mississippi River. Car containing 150 maximum and 150 catawbiense, collected as above. 1½ to 4 ft., clumps,—total of 300—for $400. Car containing 250 maximum and 250 catawbiense 1½ to 4 ft., clumps,—total of 500—for $550.

Kalmia latifolia (Mountain Laurel)

"Collected" Clumps by the Carload

Highest-class clumps collected from the open, delivered free at your station, if east of the Mississippi River.

HAVE YOUR CLUMPS BURLAPED. IT IS THE ONLY PROPER WAY TO HANDLE SPECIMEN PLANTS.
SEE NEXT PAGE FOR COST.
